

# Thumb Print Bugs!

Look at all those legs! Can you use your thumbs, ink, and crayons to create a bug with the correct number of legs?

**Millipedes:** Four legs per body section, two on each side.

**Centipedes:** Two legs per body section, one on each side.

**Insects:** Six legs, three on each side, on the middle of their three body sections.

**Spiders:** Eight legs, four on each side, on the first of their two body sections.
